

Final Project Interim Report

1. Project Summary

Briefly restate your project goal. What NLP problem are you addressing, and why is it interesting or important?

2. Data

Describe the dataset(s) you're using:

- **Source of the data**
- **Size and structure**
- **Any preprocessing or cleaning you've done so far**

3. Approach

Explain your current plan for tackling the project:

- **What methods, models, or tools are you using?**
- **Any libraries or frameworks (e.g., Hugging Face, spaCy, NLTK)?**
- **If you've changed your original plan, explain why.**

4. Progress So Far

Summarize what you've accomplished:

- **Any experiments or analysis you've already run**
- **Initial findings or visualizations, if applicable**

- **Challenges or unexpected results**

5. Next Steps

- **What do you plan to do in the next week or two?**
- **What are the remaining components of your project?**
- **Do you anticipate any obstacles?**

6. Questions or Concerns

Include at least one question you'd like feedback on. This could be technical, conceptual, or about project direction.
